## How to post an update

Join the conversation by adding an update or story, 'like' someone else's post, or comment on other posts.

Your comments and screen name will be displayed publicly, but we won't share your email details unless you add it to the content.

Share and comment as much as you like!

This forum will remain open for submissions until the end of June 2019, and how it is used will inform the design of the longer-term Healthy V online information sharing and reporting space.

## What's happening in Westernport and Mornington Peninsula

Add event details, link to resources, share photos, or comment on anything and everything about our waterways in Westernport and Mornington Peninsula.

# HWS Collaborative Implementation Framework

## Implementation forums

- Oversight of Catchment programs implementation
- Catchment collaboration

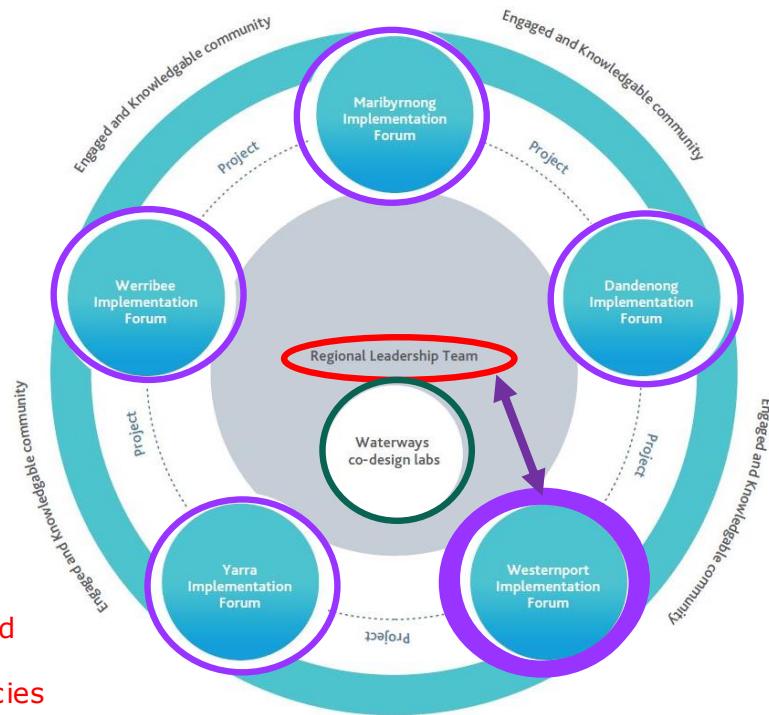

## Waterways co-design labs

- Think-tank for region-wide issues

## Region-wide Leadership Group

- Oversight of Strategy implementation and governance
- Linkages with related processes and policies
- Process for systemic issues

# HWS collaboration model – Feedback from July 18 Westernport catchment collaboration workshop

## General support

### Areas for further exploration:

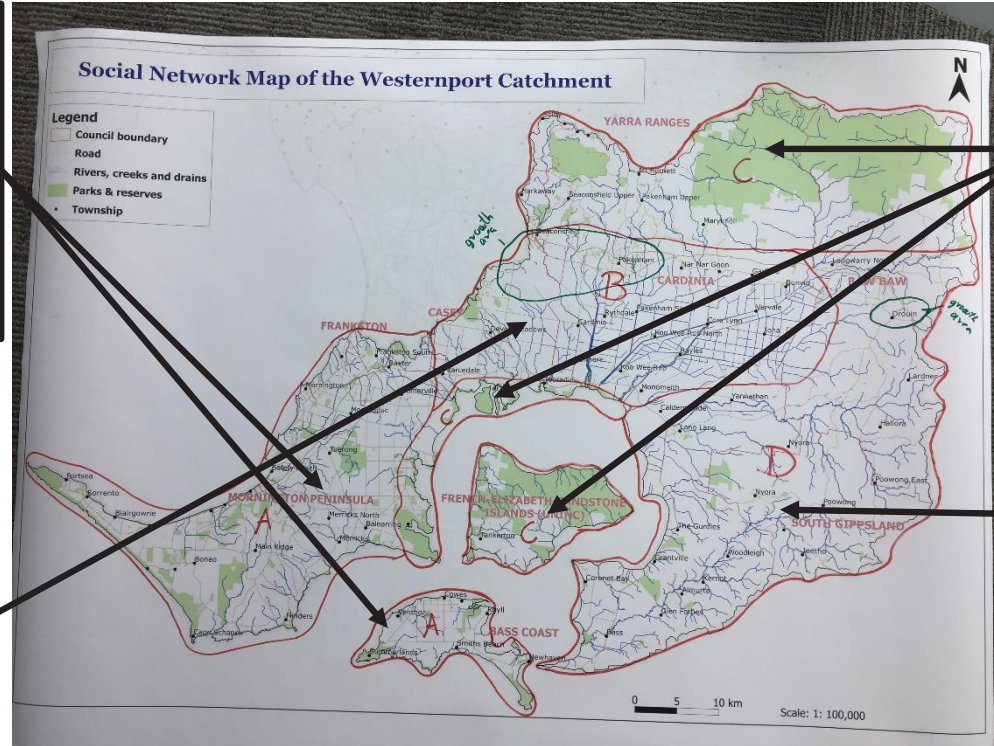

- Collaboration offers an opportunity to align planning of works and advocate
- Local projects and people on the ground need to be connected and supported
- Engagement with industry groups and the broad community is important
- Link with scientists
- Tracking progress towards objectives is critical
- Meeting frequency and opportunity to connect between meetings
- Important to clarify time commitment

## **Possible collaboration approaches**

# Discussion: Proposed groups

Group A: strong 'friends groups' activity, urban/tourist/nature areas including some agricultural activity e.g. hobby farms

Group B: market gardens, horticulture, stormwater/drain age

Group C: Natural and recreational areas

Group D: Dairy farming and grazing

## Next steps

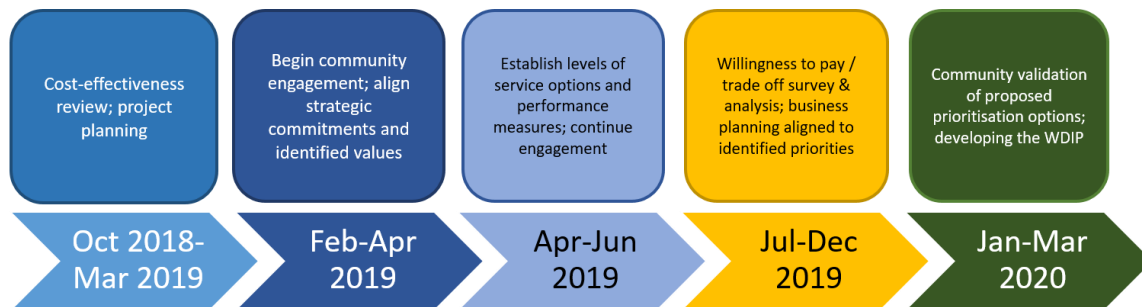

# Waterways and Drainage Investment Plan (WDIP)

## What is the Investment Plan and why is it important for the HWS?

- Details MW's proposed program of works and associated investment in waterways, flood protection and preparedness, drainage, and stormwater management.
- Aligns programs with identified priorities in the HWS, community priorities and willingness to pay; proposes actions that will work towards POs and targets.
- Mandatory for ESC regulated price setting, enabling revenue to pay for five year programs from 2021/22 to 2026/27

## How can the HWS catchment communities be involved in the WDIP review?

- WW&D Customer Council: established, incl. representatives across the catchments
- Feedback & FAQs on the Price Submission YourSay page

# Investment Plan - context

## 10-year Performance Objectives

## 1-year Priorities

### 2019/20 Waterway Condition and Stormwater Quality Investment Plan

13 December 2018

Info link: <http://info/mfio/csa/www/20782034>

Melbourne Water is owned by the Victorian Government. We manage Melbourne's water supply catchments, rivers and most of Melbourne's storage, and manage rivers and creeks and major drainage systems throughout the Port Phillip and Westernport regions.

Enhancing Life and Livability

# Interim Region-wide Leadership Group

## Key purpose

- Develop ToR for permanent Region-wide Leadership Group incl. membership
- Oversee Strategy implementation
- Ensure good linkages with related processes and policies
- Ensure processes are in place for shared learning

## Membership

- Independent Chair, Prof Rob Vertessy

## Key questions

- How do catchment forums and RLG work together?
- TO and community representation
