Uncontrolled Spills Project

October 2018

Works commencing in October 2018

The Uncontrolled Spills Project is scheduled to start late October 2018 and be completed mid to late 2019. This project includes the construction of two new penstocks and the upgrade of two existing emergency relief structures to control sewage flows from the Croydon Main Sewer and The Basin Branch Sewer.

Reducing Sewage Spills

The new penstocks, which are like gates, will divert sewer flows, helping to reduce the likelihood of sewage overflows spilling onto properties. The design and construction of these works is part of the 'Enhancing Our Dandenong Creek' program.

Location of Works

There are three separate work locations:

- The Dandenong Creek Trail west of Marie Wallace Bayswater Oval, Bayswater
- Tarralla Creek southwest of Canterbury Road, Heathmont and
- Bungalook Creek south of Wayne Court, Heathmont.

Works will start first at the Dandenong Creek Trail location in Bayswater in late October 2018 to be followed by the other two locations. We will inform local residents and other stakeholders prior to works starting at both Heathmont locations (please see Work Site Maps overleaf).

What will I notice?

Work hours will be 7am – 6pm Monday to Friday

The works are expected to be completed by mid to late 2019 followed by revegetation works (all works schedules are 'weather permitting').

Water and Sewerage Services

We don't anticipate any impacts to your water and sewerage services during these works.

Noise, Dust and Odours

You will see some heavy vehicle movements and the construction of temporary site compounds at work locations. There will also be some minor noise, some dust and odours associated with the works.

Temporary Detours

During the works the Dandenong Creek Trail shared use path that runs behind Marie Wallace Bayswater Oval will be temporarily detoured – from late 2018 until early 2019 (see Map of Dandenong Creek Trail detour overleaf).
